

POWERED BY CYNTRA A.I.

WHY CLOUDPULSE?

Know Your Risk Posture

Understand exactly where your Cloudflare configuration leaves you exposed, before an incident does.

Act on Clear Priorities

Get a scored, ranked list of gaps so your team fixes what matters most, not what's easiest.

Results in Under 10 Minutes

No consultant engagement needed. Run a full posture assessment automatically in minutes.

Prove Security Progress

Share a professional health report with leadership, auditors or compliance teams on demand.

Security & Performance Maturity Health Check

A Smarter Way to Understand and Improve Your Cloudflare Security Posture

KEY FEATURES

A.I.-Powered Analysis

Cyntra A.I. intelligently reviews your security configs, performance settings and operational maturity.

Instant Health Score

A clear visual score across Security, Performance and Configuration Hygiene — no manual interpretation needed.

Tailored Recommendations

Receive specific, prioritised guidance based on your actual Cloudflare configuration and known industry gaps.

Acknowledgement Framework

Mark intentional configurations as accepted to keep your results accurate and free of noise.

Exportable Reports

Download a professional health report for internal reviews, leadership briefings or compliance evidence.

Multi-Zone Support

Assess one zone or your entire estate — CloudPulse scales to your environment automatically.
